iX-15 Intel 1.5GHz

Touch Screen POS Terminal

Powered by the Intel Celeron-M 1.5GHz processor, the iX-15 helps deliver speed at the point of service to enable fast retail transactions when it matters most.

The clever all-in-one design of the iX-15 saves counter space yet still manages to provide a large 15 inch touch screen, allowing operators to find and sell products quickly. A wide choice of interface ports provides superb connectivity to peripheral devices such as printers, scanners, cash drawers and customer displays

iX-15 1.5GHz Intel - Key Benefits

Robust design Designed for harsh retail environments including pubs and kitchens, the iX-15 has an IP43 rated screen to prevent water ingress.

Lower cost of ownership The iX-15 has been designed with a clever chip set and CPU that have power saving functions, resulting in lower energy consumption.

Flexible design The elegant, small footprint design will fit into any retail environment. The iX-15 can be counter mounted or wall mounted according to your needs.

Environmental protection Eco friendly low power design. RoHS compliant.

Open architecture The iX-15 is preloaded with the WEPOS operating system which has been specifically designed for Point of Sale. The open system architecture provides the platform to run all of the leading POS software packages.

Customer advertising A 2nd customer facing LCD display is available as an option, providing the opportunity to display customer adverts and increase revenue from rented advertising.
